Application/Control Number: 09/989,640

Art Unit: 1751

#### **DETAILED ACTION**

#### Election/Restrictions

- 1. Applicant's election with traverse of Group II in Paper No. 7 is acknowledged. The traversal is on the ground(s) that the examiner has not supplied any examples of the separate utility of Groups III and IV. This is not found persuasive because the examiner has noted that they have utility as fabric softeners. Applicant further states that the examiner has not recited any material differences between the compositions of Group I and Group II. This is correct, but it is not persuasive because only one-way distinctness need be demonstrated.
- 2. Groups III and IV have been rejoined with Group II for reasons unrelated to applicant's traverse.

The requirement is still deemed proper and is therefore made FINAL. Claims 1-55 are withdrawn from consideration by the examiner as being drawn to an invention non-elected with traverse, the requirement having been timely traversed.

### Claim Objections

3. Claim 56 is objected to because Formula I should be present in the text of the claim.

# Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 09/989,640

Art Unit: 1751

5. Claim 57 contains numerous trademarks/trade names. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe silicone polymers and, accordingly, the identification/description is indefinite. Applicant must replace the trade names with the specific MW and makeup of these polymers, and supply evidence that, at the time of filing, this was what was commercially available under these trade names.

Page 3

### Claim Rejections - 35 USC § 103

6. Claim 58 is rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admissions against interest. Applicant has stated that the softness index of the recited polymers should be "at least about 30". At p. 25 of the specification, applicant says that suitable polymers should have a softness index of "at least about 15", and most preferably have a softness index of "at least about 25". This disclosure is followed by a plethora of exclusions. A fair reading of this passage implies that all of these excluded polymers have a softness index of at least about 15 and that some or all

Application/Control Number: 09/989,640

Art Unit: 1751

overlap with the limitation of at least about 30. If applicant wishes to traverse this rejection, the softening indices of the excluded polymers should be provided in affidavit form.

#### Allowable Subject Matter

- 7. Claim 56 would be allowable if the objection were overcome.
- 8. The following is an examiner's statement of reasons for allowance: While silicone polymers are well known in the polymer and cleaning arts, the process of using Equation I to design a suitable silicone is not disclosed or made obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

- 9. Any prior art made of record and not relied upon is of interest and is considered pertinent to applicant's disclosure.
- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner, Dr. John R. Hardee, whose telephone number is (703) 305-5599. The examiner can normally be reached on Monday through Friday from 8:00 until 4:30. In the event that the examiner is not available, his supervisor, Dr. Yogendra Gupta, may be reached at (703) 308-4708.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0661.

John R. Hardee Primary Examiner October 14, 2003
